FORM A2. BRITISH RAINFALL.

24 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Mardy, Aberdare

in the County of Glamorganshire

by Sir William T. Lewis Bart

RAIN GAUGE
Pattern Symonds
Diameter of top 5 ins
Height of top above Ground 1 ft. — in.
" " " Sea Level 431 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Aberdare
Distance 300 yards Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910.

FORM A2. BRITISH RAINFALL.

4 FEB 1911

Kept at Abernant House, Aberdare

in the County of Glamorgan 6

by Sir William T. Lewis, Bart.

RAIN GAUGE
Pattern Symons.
Diameter of top 5 ins.
Height of top above Ground 1 ft. - in.
" " " Sea Level 431 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Aberdare
Distance 400 yds. Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

28 MAR 1910

REGISTER OF RAINFALL IN 1909

Kept at Dinas Powis Reservoir

in the County of Glamorgan

by J. E. Franklin

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 165 ft.

Time of Observation 9 am

Nearest Railway Station
Name Dynas Powis
Distance 1 Mile Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at The Observatory, Penylan,
~~in the County of~~ Cardiff
by Dr. E. Walford

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 204 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Cardiff
Distance - Direction -

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Cwmaman Collieries

in the County of Glamorgan

by

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. 2 in.
" " " Sea Level 930 ft.

Time of Observation 9-0 A.M.

Nearest Railway Station
Name Aberaman
Distance 2½ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

Kept at Penllergaer
in the County of Glamorgan
by Sir John T. Dillwyn Llewelyn

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 3 ft. in.
" " " Sea Level 240 ft.
Time of Observation 9. a.m.
Nearest Railway Station
Name Gorseinon
Distance 2 Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
22 FEB 1910

Kept at Howell's School, Llandaff

in the County of Glamorgan

by Alice G. Winny.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 4 in.
" " " Sea Level 86 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Ely. G.W.
Distance 1 mile Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
20 MAR 1911

REGISTER OF RAINFALL IN 1910

Kept at Howell's School, Llandaff nr Cardiff

in the County of Glamorgan 6

by Alice G. Winny

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 4 in.
" " " Sea Level 86 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Ely. G.W.R.
Distance 1 mile Direction S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Time of Observation 9. am

Nearest Railway Station
Name Mountain Ash T.V.R.
Distance ½ mi Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

-3 JAN 1910

Kept at Neath ~~Hosp~~ End

in the County of Glamorgan

by Edwin C Pole

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
„ „ „ Sea Level 204 ft.

Time of Observation 7·0 a.m

Nearest Railway Station
Name Neath
Distance 1 mile Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Neath

in the County of Glamorgan 4

by Edwin G. Pole

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 204 ft.

Time of Observation 7.0 a.m.

Nearest Railway Station
Name Neath
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

REGISTER OF RAINFALL IN 1910

Fairy Land
Kept at Bryntirion . Neath

in the County of Glamorgan.

by Cd. Lb Green.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 9
" " " Sea Level 250 ft.

Time of Observation 9. am

Nearest Railway Station
Name Neath
Distance 1¼ m Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by Tenton Jones

RAIN GAUGE: Pattern	ordinary
Diameter of top	5 in.
Height of top above Ground	0 ft. 9 in.
" " " Sea Level	200 ft.
Time of Observation	9 AM
Nearest Railway Station: Name	Oystermouth
Distance	1½
Direction	SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
-9 JAN 1911

Kept at Twyn-yr-hydd, Margam
Port Talbot
in the County of Glamorgan 5
by G. Lipscomb

Rain Gauge
Pattern Funnel
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 180 ft.
Time of Observation 9 A.M.
Nearest Railway Station
Name Port Talbot
Distance 4 m. Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

18 JAN 1910

Kept at Pontlluestwen Mardy

in the County of Glamorgan

by William Jones

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 1225 ft.

Time of Observation 9 am

Nearest Railway Station
Name Mardy T.V.R
Distance 2 miles Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

My Notes. Figures connected with the card of the Gardener who kept the Daily record
J. E. Ha[illegible]
15-5

Le Margate Oystermouth
Glamorgan.

unique value. They include a series of portraits, historical pictures and rare prints which serve to elucidate the letterpress in a way never before attempted in any previous edition of this work.

Terms of Payment.

The work will be complete in seven volumes at 7/6d each, and delivered as published on the following terms:- 2/6 on receipt of the first volume and 2/6 monthly until the full price is completed.

As the monthly terms of payment will be raised immediately the second volume is issued, if you wish to avail yourself of this exceptional offer please return order form with as little delay as possible.

Yours faithfully,

FOR THE CAXTON PUBLISHING COMPANY.

J Malcolm

FORM A2. BRITISH RAINFALL.

17 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Kings Dock Swansea.

in the County of Glamorgan

by Swansea Harbour Trust.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 4 ft. 6 in.
" " " Sea Level 31·50 ft.

Time of Observation 9.30 AM.

Nearest Railway Station
Name Dan-y-graig
Distance ½ Mile Direction NE.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern
Diameter of top 12 in.
Height of top above Ground 14 ft. 9 in.
" " " Sea Level 40 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name L & N.W.
Distance 1 Mile Direction NW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

by

RAIN GAUGE
Pattern
Diameter of top 12 in.
Height of top above Ground 14 ft. in.
" " " Sea Level ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name G.W.R.
Distance ½ mile Direction NW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
25 JAN 1911

Kept at Treharris Service Reservoir

6

in the County of Glamorgan

by Thos F. Harvey Esqr. C.E.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 865 ft.

4079

Time of Observation 9 a.m. 8 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A. BRITISH RAINFALL. 25 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Treherbert, Tyn-y-waun
in the County of Glamorgan 6
by O. Thomas Esq

RAIN GAUGE { Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 801 ft.

Time of Observation

Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
6 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at The Wern Schools Ystalyfera GJP

in the County of Glamorgan

by James Williams

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 240 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Ystalyfera (M.R)
Distance 200 yds Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
